Description

Black and Blue tomatoes: AMETHYST JEWEL Tomato

Indeterminate, regular leaf plant. Medium sized, irregularly shaped pink fruits, 150-250 gr, with meaty interior and very few small seed chambers. The fruits at the bottom of the plants were solid pink with just a bit of purple/blue tinge, probably because they were shaded by the dense foliage. Later fruits that grew higher on the plants have the gorgeous purple tinge that is typical for antho tomato varieties. Very good sweet flavor. Heavy producer.
