Description

Mid early variety (75 days from transplant). Determinate, growing 80 cm - 1 m in height. Brilliant orange, oxheart fruits have a small nipple at the blossom end, giving them one of the most perfect heart shapes of any tomato variety known. The fruits reach 200-250 gr in weight. The flavor of the meaty fruits is sweet, complex and just a little tart for an orange variety. Fruits are good for canning or sauce.
