Description

Original Russian cucumber seeds (from Russian Seed Company „Gavrish“). Early hybrid (45 days). Just 45 days from sowing - while others are barely getting started - this cool-weather beauty is burgeoning with plump, ripe fruit. The secret? No pollen is needed. That means you don't have to wait for the bees to arrive in your garden and cross-pollinate your plants! It also thrives in warmer weather--in fact, you can even grow it in a greenhouse! These nearly 100% female plants produce huge yields of dark green, crunchy-sweet, small-spined, seedless 8- 10 cm cukes. Ideal for pickling or for eating fresh.
