### Description

Yellow carrots are a slightly sweeter alternative to regular orange carrots. Moist and crunchy, they are delicious raw and retain their bright color when cooked. Solar Yellow has a refreshing flavor that is a welcome addition to a salad or stir-fry and adds vibrant color to any presentation that includes several carrot varieties. While its sunny color makes the Solar Yellow carrot unique. The butter-yellow roots are shaped, 15 to 18 cm long. A sturdy, maincrop variety that is suitable for sowing in March to early July, it matures in 65 to 70 days.
