Description

45-50 days. This really is a pretty little Summer Squash with a wonderful fresh almost citrus flavor and soft skin. If you pick these small enough around 5 cm in diameter they are lovely to eat raw - but in any event we wouldn't let these get much bigger than 7.5 cm in diameter. Bush-type plants that produce nice yields of scallop-shaped fruits with bright yellow-orange skin. They remind me of flaying saucers. They are very easy to grow and extremely flavorful.
